Problem Statement

FinTech Domain

AI Based Personal Finance Intelligence and Risk Prediction Platform

TEAM NAME

SyntaxSoul

Member 1: Vedika Kute
Member 2: Koushiki Khobare
Member 3: Madhura Katole
Member 4: Sanika Surange

Proposed Solution

1. What-If Simulator

- Real-time decision impact simulation
- Affordability check for purchases
- Instant future savings & risk display

2. Behavioral Analysis

- Detects recurring spending patterns
- Identifies overspending triggers
- Personalized discipline insights

3. Retirement Planning

- Long-term savings requirement estimates
- Monthly contribution plan suggestions
- Secures stable financial future

4. Emergency Fund

- 3–6 month expense buffer calculation
- Current savings vs. required tracking
- Safety for unexpected situations

5. Risk Prediction

- Detects overspending trends in real time using ML models, sending proactive alerts before debt escalates.

Tech Stack & Architecture

Frontend
- Dashboard UI
- What-If Sim
- Goal Tracker
- AI Chatbot UI
- Reports/Insights

Backend APIs
- Behavioral Analysis
- Risk Alert
- Investment Engine
- What-If Model
- Retirement Finance Analysis
- Goals Planning
- Budget Insights

AI Models
- **What-If Model** — Scenario scoring
- **AI Insights**
- **Behavior Model**

Data Layer
- **Users & Profiles** — Creds, preferences
- **Transactions** — Spend history
- **Retirement Plans** — Long-term goals
- **Emergency Fund** — Buffer targets
- **ML Model Cache** — Inference results

Next Steps

TRANSACTION EXTRACTION

Automated Data Capture

Automatically capture details from SMS alerts and bank statement PDFs. Converts data into structured `.csv` format for seamless expense tracking.

FINANCIAL LITERACY

Awareness & Guidance

Providing educational resources, expert tips, and best practices for effective money management and developing smart spending habits.

AI INVESTMENTS

Smart Recommendations

Personalized analysis of financial status and risk profile to suggest suitable investments like SIP and LIC policies for better decision-making.

Conclusion

Our AI-powered Personal Finance Intelligence System provides a complete end-to-end solution for smart financial planning and risk prediction.

Features

- Budget Insights & Goal Tracking
- Risk Alerts & Emergency Fund Analysis
- Retirement & Behavioral Analysis
- Investment Recs & What-if Simulator

KEY OUTCOME

Transforms data into meaningful insights using data-driven analytics.

Simplifies personal finance and supports better financial awareness and planning.
